

# Business Process Management

Your Partner of Choice, when outsourcing is a key enabler of performance improvement

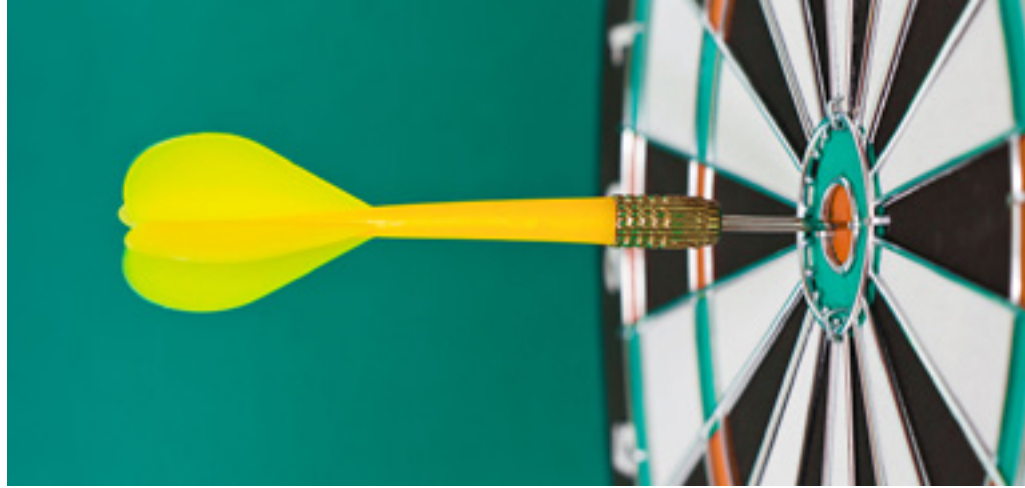

Global and multi-locational businesses often face challenges in maintaining lean finance processes across boundaries. Ensuring simple, lean and scalable processes that can quickly adapt to the needs of dynamic businesses are essential. Such processes ensure discipline, reduce compliance risks, catch frauds, increase efficiency, ensure uniform policy implementation, etc.

Finance teams often find themselves managing day to day transactions along with routine tasks such as checks and controls. Nexdigm (SKP) aims to relieve the finance department of such activities so that it is freed up to focus on more important strategic roles of business support and controllership. We work as a reliable partner to ensure that the back-end functions remain aligned to the business and adapt to its changing needs.

At Nexdigm (SKP), we follow a simplified yet effective process. We first listen to you to understand the nuances of your business, apply our knowledge and experience to eliminate waste and then create a sustainable process that is in line with your policies and which optimizes your resources. What differentiates our services is that we do not stop at advisory services, we also help implement process changes, and often take on the management of these processes to ensure sustainability, continual improvement and scalability which keeps pace with the business and its growth.

# Our Approach

Our BPM operations are built on our legacy of being a trusted partner. Our ethos is simple – to deliver measurable business benefits that enable our clients to focus on their core business while we help them with critical but non-core activities.

## Working beyond SLAs

While a service-level agreement sets the baseline for performance, our approach is that of continuous improvement of processes. Our keenness to understand our client's business and our constant interaction with them builds an environment of trust that allows us to deliver solutions far beyond our contracted scope. In fact, most of our clients consider us as an extension of their team and not just a vendor. Over the years, we have developed a good grasp of our client's requirements and concerns, even reading between the lines to gain insights and always looking for cues to better our services.

## Leveraging our heritage

At Nexdigm (SKP), we have the ability to provide and execute solutions that comply with business, governance, compliance and regulatory requirements. Using our strong accounting and tax background, we are able to harness this knowledge and apply it to any transactional or accounting work and ensure preventive checks and controls. This also results in saving valuable time and expenses for internal and external audits.

## People

We firmly believe that our people are our real strength. We hire on attitude – passion and a thirst for innovation are core attributes – and train them to be more proactive, responsive and responsible on the job. The overarching philosophy is to create an environment where our employees learn and grow with the business. With an accomplished and forward-thinking senior management, we have a solid learning and development framework across all levels. Our continuous training ensures that team members develop the right blend of technical and functional skills to succeed in their roles, to understand the client and their business, and to deliver beyond expectations.

## Operational excellence

We leverage our industry knowledge, process expertise and technology to deliver solutions that are cost-effective. We are constantly striving to build on our strong foundation and create a framework that delivers excellence. Automating any rule-based task and using our resources for an analytical approach to processes have enabled us to deliver what we promise.

# Our Services

The solutions we provide are customized to our client's needs, and everything we do is aimed at delivering a tangible business benefit to our client.

## Business Process Consulting

Process consulting consists of:

- Conduct a process study
- Provide a Gap Analysis of 'As is--to-As Should be'

# Value Proposition

- The finance team is freed to focus on priority roles of business support and controllership
- Achieve better governance and control within processes support regulatory compliance
- Better risk management
- Achieve efficiency and cost reduction through continual improvement and intelligent use of technology
- Standardization of processes and practices across multiple locations and business segments
- We will be your single point of contact across subsidiaries and compliance assurance

## Our Credentials

Managed all buy-side contracts across the globe for a large US-based business. It involved working across countries, entities, and teams to deliver a consistent and seamless turnaround of contracts within specified timelines. The engagement meant working with the client to create negotiation playbooks and actively partnering with the commercial and legal teams for faster closure.

Assisted a software company that specializes in managed engineering services for the pharma industry. Our team was given complete ownership of accounts payable, accounts receivable, bank, payroll, general ledger management processes for all countries in which the client operated, namely, Ireland, US, UK, Germany, Singapore, and India.

Our team was given complete ownership of the accounts payable and recharge processes for a UK AIM-listed company that manages over 150 aircrafts and operates in the UK, US, Dubai, Switzerland, and Hong Kong. We manage these processes for all locations of the client with a delivery team of over 65 persons.

Assisted multiple clients in transitioning from one ERP system to another and provided ongoing master maintenance. It involved working with the clients, ERP consultants, and multiple internal IT applications.

Set up a shared service center for a PE-owned healthcare firm. It combined F&A and compliance management across Asia. The solution involved working across cultures, time zones, and languages to deliver seamless services. It enables the financial controller to have effective management without having to add to the headcount across countries.

# About Nexdigm (SKP)

Nexdigm (SKP) is an employee-owned, privately held, independent global organization that helps companies across geographies meet the needs of a dynamic business environment. Our focus on problem-solving, supported by our multifunctional expertise enables us to provide customized solutions for our clients.

We provide integrated, digitally driven solutions encompassing Business and Professional Services, that help companies navigate challenges across all stages of their life-cycle. Through our direct operations in the USA, Poland, UAE and India, we serve a diverse range of clients, spanning multinationals, listed companies, privately-owned companies, and family-owned businesses from over 50 countries.

Our multidisciplinary teams serve a wide range of industries, with a specific focus on healthcare, food processing, and banking and financial services. Over the last decade, we have built and leveraged capabilities across key global markets to provide transnational support to numerous clients.

From inception, our founders have propagated a culture that values professional standards and personalized service. An emphasis on collaboration and ethical conduct drives us to serve our clients with integrity while delivering high quality, innovative results. We act as partners to our clients, and take a proactive stance in understanding their needs and constraints, to provide integrated solutions. Quality at Nexdigm (SKP) is of utmost importance, and we are ISO/ISE 27001 certified for information security and ISO 9001 certified for quality management.

We have been recognized over the years by global organizations, like the International Accounting Bulletin and Euro Money Publications.

Nexdigm resonates with our plunge into a new paradigm of business; it is our commitment to *Think Next*.
